Kripa shankar jha

Java Software Engineer Tranning at HP Internship Programme

kripashankarjha9@gmail.com

Summary

I am geeky programmer enjoy to learn typical algorithm related problems and solve it with the proper data-structure, I have well knowledge in java J2SE platform and I have used java apis , and libraries I love to code problem in the same language ,Actually I love its object-oriented feature.

I love to design Application on Android. And I have Made some of them , I have explored different enviroment / APIs that google provided in the android platform and i am in learning phase of that .

I Enjoy Competitive programming (CP) as well I usually practice it on code forces, codechef , and hackerEarth. I am always keen to Learn and I want to learn those critical Algorithms which we are using in our day-today life using the program, more-less Machine Learning.

I have learned Deep Neural Networks some what it's interesting more Surprising that these things are not just a theory But is practically implemented and I would definitely work and explore this field soon.

Experience

Java Software Engineer at   HP summer tranning on java and android

June 2016 - Present (11 months)

   To learn and develop android based application google map APIs and firebase components to make a full side
   android application.

Student at   Lovely Professional University

August 2014 - Present (2 years 9 months)

   Working as Student

Student at   Computer science Student at Lovely professional University

August 2014 - Present (2 years 9 months)

Education

lovely professional university

B.tech in Computer science, Computer Science, 2014 - 2018

Bokaro Ispat Senior Secondary School

Bachelor of computer sciences, Computer Science, 2012 - 2014

Skills & Expertise

Microsoft Office
Customer Service
Microsoft Excel
Management
PowerPoint
Public Speaking
Research
Project Management
Leadership
Java
C
C++
Microsoft Word
HTML
Programming
Team Management
Algorithms
Microsoft PowerPoint

Courses

B.tech in Computer science, Computer Science

lovely professional university

c++

J2SE java standered edition , java core

Independent Coursework

Deep Nural Networks

Android progrmmaing

Certifications

Java with Android Cretification from H.P

Honors and Awards

Best Innovative Idea (Ambulance tracking system)

Govt of telangana ,#bioasia2017

February 2017

Bagged the position among top five most promising innovative idea for startup .
